## Dr. Susan Love Foundation for Breast Cancer Research Welcomes New Medical Advisor Dr. Ana Lilia Lopez Aldrete

**Los Angeles, California** — Dr. Susan Love Foundation for Breast Cancer Research is excited to announce the appointment of a new Medical Advisor joining the Foundation.

Joining the Foundation is Dr. Ana Lilia Lopez Aldrete, a highly qualified medical specialist who brings over 20 years of devoted experience with an accomplished dedication to breast cancer research.

Dr. Lopez has a strong background in breast cancer research and gynecological studies. She has been the head of the Breast Clinic at Dr. Valentin Gomez ISSSTE Regional Hospital for 24 years and was the Gynecology Course and Gynecology and Obstetrics Practicum teacher at the Universidad Del Valle De Mexico from 2014-2020. Dr. Ana Lilia received her degree as a surgical doctor and obstetrician from the College of Medicine at the Universidad de Guadalajara in 1996 and obtained a degree as a medical specialist in gynecology and obstetrics with a certification course in basic laparoscopy from the Universidad Autonoma De Sinaloa in 2001.

Dr. Ana Lilia has played a vital role in the fight to end breast cancer. She has completed many studies that push forward the use of ultrasound to identify breast cancer in her patients in Mexico. In particular, she has been the driving force in the Foundation's Self-Reading Portable Ultrasound study that is now in Phase III. She has helped demonstrate that AI can be incorporated into a handheld ultrasound device and is as reliable as the standard x-ray, which will ultimately be used to help identify breast cancer more easily in low to middle income countries.

She is known for working tirelessly to provide the personalized care her patients need and producing innovative, groundbreaking research. Dr. Ana Lilia joins Dr. Stephanie Graff and Dr. Lauren Green on our Medical Advisory Board.

### About Dr. Susan Love Foundation for Breast Cancer Research

**Dr. Susan Love Foundation for Breast Cancer Research** challenges the status quo to end breast cancer and improve the lives of people impacted by it now through education and advocacy. The Foundation drives collaborative, cutting-edge research with nontraditional partners, brings to light the collateral damage of treatment and seeks ways to diminish it, and interprets science to empower patients. Fast, flexible, and project-based, the Foundation actively engages the public in scientific research to ensure that it produces accurate and meaningful results.
