About Dr. Susan Love Foundation for Breast Cancer Research

Dr. Susan Love Foundation for Breast Cancer Research challenges the status quo to end breast cancer and improve the lives of people impacted by it now through education and advocacy. The Foundation drives collaborative, cutting-edge research with nontraditional partners, brings to light the collateral damage of treatment and seeks ways to diminish it, and interprets science to empower patients. Fast, flexible, and project-based, the Foundation actively engages the public in scientific research to ensure that it produces accurate and meaningful results.

About the Symposium

The key to identifying the cause of breast cancer and determining methods to prevent it lies in understanding the normal human breast and how it develops malignancy. To accelerate progress, it is critical to transition the study of the breast from animal models to humans. New technologies for DNA/RNA analysis and procedures to obtain samples or observe human breasts in situ are opening up promising new avenues for exploration. The International Symposium on the Breast brings together a multidisciplinary and international group of iconoclastic researchers, clinical scientists, advocates, and challenge participants to formulate new technical approaches to the study of the normal and high risk breast cancer.

Dr. Susan Love Foundation for Breast Cancer Research will host the 10th International Symposium on the Breast on February 4 – 6, 2023 at the Meyer & Renee Luskin Center in Los Angeles, California.

Goals for the Symposium:

- Foster application of next generation science and new methods to access the normal human breast to identify the cause and prevent breast cancer
- Inspire new approaches by engendering multidisciplinary collaboration in a stimulating, non-clinical environment

Sponsorship Opportunities

PRESENTING SPONSOR
\$50,000

PLATINUM SPONSOR
\$25,000

GOLD SPONSOR
\$15,000

SILVER SPONSOR
\$10,000

BRONZE SPONSOR
\$5,000

EVENT VENDOR
\$2,500

Sponsorship Benefits
